HARD SKILLS

- C# Unity Medium
- HTML And CSS Basic
- Python Basic
- C++ Basic
- 3D And VFX Basic
- AI Basic
- Shader Programing

SOFT SKILLS

- Team work
- learn fast
- like a challenge
- Able to work under pressure
- Comfortable with change

EDUCATION

🎓 2022-Now

Bachelor of Computer Game and Esports (3rd year)

Rangsit University

GPA: 3.8 / 4.0

Coursre Taken

- AI
- Design Pattern
- 3D modeling and 3D Animation
- Web development
- Shader programing
- Online multiplayer game

PROFILE

I've always been fascinated by how games work. Watching my older sister play sparked my interest. I'd wonder how NPCs moved or how certain game mechanics were created. I couldn't play myself, so I'd watch and learn. This early exposure ignited my passion for game development. I want to create games that people can lose themselves in, just like I did as a kid.

WORK EXPERIENCE

Revenue Department

2020

Warehouse Management

- I had a great internship experience at the Revenue Department. I gained hands-on experience in warehouse management, using Excel to streamline processes and improve efficiency.

PROJECT

light to the ashes (University Project)

3D isolation game that player play as a young girl tasked with solving intricate puzzles to heal a dying forest.

- As a coder, VFX artist, shader programmer, and story writer, I played a key role in the design and development of this game alongside my team.

NameLessBoy (Project for NSC Contest)

2D Platform turnBase Game

- I've collaborated with a team to design and develop games. My responsibilities included game design document (GDD) creation and coding implementation.

ItsAKnightTimes (Personal Project)

2D Top Down Shooting

- I'm proud to have been part of the team that created 'ItsAKnightTimes,' my first game. I contributed as a coder.

ETC.
